\$1.05 PER POUND

But all this is in danger of neconing accessed than a pleasant memory for a lot of people.

The "bacon for breakfast" habit was a pleasant one to pursue for a lot of families but that was when the price of bacon was within the "reasonable" limits. Now, with the price tag on many brands of bacon readducers might find that a lot of people are "settling for

feeling of dissatisfaction lies in the general belief that there is too much price spread between producer and consumer. But wherein lies the remedy except by rereason of a glutted market.

A simple, less expensive marketing procedure might help whereby this and other farm products were marketed more directly and with less elaborateness.

Editorial

\$1.05 PER POUND
There's nothing like a few slices of fried bacon
to get a man off to a good start in the morning. When
he opens his eyes to the light of another day and his
thoughts come into focus as he starts mentally mapping the day's program, it's hard for him to really con-

EVERYBODY WELCOME

Shell announces two great new motor fuels, the successors to Shell Premium and Shell Gasoline

# the team that satisfies the octane needs of every make of car!

ow, regardless of the make of ear you drive, you can have a fuel which automatically supplies the full octane value required for every driving situation.

Today's cars are built around the m powerful engines in motoring history. And the trend is aiming still higher.

Anticipating the need for higher grades of otor fuel, Shell Oil Company of Canada Limited has introduced two brand new gasolines.
Super Shell with TCP for high compression cars, and new Shell with TCP for all other cars.

Now you can choose the gasoline that will give you the finest performance your car can deliver—the gasoline which automatically sup-plies the full octane value your engine requires

The combustion energy in these great new Shell motor fuels gives you an added bonus, too. When you're cruising, their reserve energy is converted to more miles in every tankful.

And not only do both of Shell's new moto fuels have much higher octane, both contain TCP\*. This patented additive neutralizes harmful engine deposits that cause loss of power, to assure you the continued peak performance and economy your engine was built to deliver.

For a new experience in motoring, see your Shell Dealer today for Super Shell in the new white pump or new Shell—both with TCP.

Shell's Trademark for this unique gasoline additive developed by Shell Research. Patented 1955.

For the greatest advance in motor fuels . . . switch to Shell

## <u>The Magdalen Islands</u> Pastoral Isles Find Prosperity

The sandy, wind-swept Magdalen Islands-picturesque home of a people renowned for their quaint, old-world ways and their quiet acceptance of a harsh environment—are today in the throes of an economic upsurge which

is bringing new opportunities and a higher standard of living to the almost 12,000 inhabitants of the slender island, floating like a silver fish-hook across the Gulf of St. Lawrence shipping lanes.

Fishing trawlers, built with government help, have greatly increased the annual catch, although some old-timers like the one above still prefer to do things in the time-honoured way.

Up until 4 years ago, gas and oil lamps supplied the only light on the islands. An electric power plant, installed in December 1953 has brought modern conveniences and the prospects of many new industries.

Originally wooded, the Magdalens were stripped of timber long ago to build boats for fishing and homes for the fishermen. Today, fuel and lumber, like many essential commodities, must be imported.

The lonely isolation of the islanders has been broken sine the institution of regular air and steamer service whic links the Magdalens with Pictou, Charlottetown, Quebe

Lobster is one of the islanders main sources of income, followed by cod, mackerel and herring which are sold in the U.S. and West Indies as well as across Canada. Fishing cooperatives are popular with the Madelinots;

large-scale modernization program has been inaugurated in recent years involving the construction of freezing, anning and fish-smoking plants.

A WONDERFUL SUCCESS! A BRIGHT FUTURE!

A WONDERFUL SUCCESS: A BRIGHT FUTURE:

The opening day of Linday's CENTENNIAL
CELEBRATION was a 'wonderful success! Anyone
who participated in the opening formalities couldn't
fall to be impressed by the good-fellowship and optimism which marked this 10th anniversary event.

Ontario Premier Lesile Lesile M. Frost, glways and
optimist where Linday's future is concerned, put it
plainty and pointedly when he was asked to prophery
Linday's future is concerned, put it
plainty and pointedly when he was asked to prophery
Linday is future to containing Canadian province. He
end in essence: "It's up to the leaders of this community to sensure the procress and development of munity to ensure the progress and development of

Lindiay."

Indiasy Daily Post remarked on a recent editoral in Premier Post remarked on a recent of the bytes and the post of the post post of the pos orders.

We liked Mr. Frost's thoughts and we like the man himself and it is our hope that his optimistic spirit will be contagiously infective.

## Shell announces two great new motor fuels, the successors to Shell Premium and Shell Gasoline

with TCP

# the team that satisfies the octane needs of every make of car!

you can have a fuel which automatically supplies the full octane value required for every driving situation.

Today's cars are built around the me powerful engines in motoring history. And the trend is niming still higher.

Anticipating the need for higher grades of motor fuel, Shell Oil Company of Canada Limited has introduced two brand new gasolines. Super Shell with TCP for high compression cars, and new Shell with TCP for all other cars.

Now you can choose the gasoline that will give you the finest performance your car can deliver—the gasoline which automatically sup-plies the full octane value your engine requires

The combastion energy in these great n

Shell motor fuels gives you an added bonus, too. When you're cruising, their reserve energy is converted to more miles in every tankful.

And not only do both of Shell's new mote fuels have much higher octane, both contain TCP\*. This patented additive neutralizes harmful engine deposits that cause loss of power, to assure you the continued peak performance and economy your engine was built to deliver.

.For a new experience in motoring, see your Shell Dealer today for Super Shell in the new white pump or new Shell—both with TCP.

For the greatest advance in motor fuels ... switch to Shell

#### Editorial

NOW ALL WE NEED IS SOME ACTION

NOW ALL WE NEED IS SOME ACTION
A few weeks ago we carried a poem wheth was esentially designed to attract attention to the unclean
condition of the Seugos River which flows through
Lindsay. Still later, we carried an article on the unkempt condition of the river's beat channel betwee
Lindsay and Sturgeon Lake. And now, in the wake of
the Centennial froils, we learn that boat repair shops in the district are working overtime repairing many of the craft which took part in the water parade. This confirms the need for cleaning up the river which

This confirms the need tor creating up the river which was expressed on the two previous occasions.

These facts, coupled with the greatly increased boat traffic on these waters, indicates clearly the need for some action to put the waterway in safe condition

antied front by Lindsay and Victoria County officials should be presented to our local member of parliament—Mr. C. W. Hodgson—who, as parliamentary sesimant to the Minister of Public Works, should be in a position to influence the Dept. of Transport to authorize a clean-up operation for the Seugos.

The operation might include deckging out he old vice channel which provided a scent boat routs, burging out the old the control of the contr

ing it and generally renovating this portion of the Trent Waterways System. The need is apparent and action

THE ART OF WRITING

THE ART OF WRITING

There was a time (it seems to be passing) when penmanship—the art of writing—was given a prominent place in the public and separate school courses of study.... It was important that a child learn to write early and well. Close attention was paid to the subject and arduous (or so they seemed) exercises were pre-scribed and designed to make the students of that period good "free hand" writers. Many of us can recall how we were taught to grasp the pen lightly and the head upide it smoothly over the paper with any movement being controlled by the wrist and not the fingers... we can remember too, how difficult it was for us to become reasonably proficient in the art, for it was an art just a much as is any other form of creative work. Writing is a very personal art because into our writing we inject something of our personality our writing we inject something of our personality. We can all remember how we practised signing our to be a support of the property of the personal transport of the province of the p signature which pleased us and therefore expressed

a signature which pleased us and therefore expressed something do up personality. There is something pleasing about reading a well-pound letter or article . . . it is a very personal thing in that the writer seems to Thee' with the reader and is able to put warruth and a feeling into the letter which cannot be archieved in the mechanically written, mes-see. It is a 'Doy o behold' the written page, especially

88ge. It is a "poy to nenor" the written page, especially that rags carries a message from a cherished relative or an old friend. It is also a pleasure to review records which are kept in "fine hand".

There is something satisfying about being able to write well ... We cannot all be expert penmen but at least we can encourage pride in this medium of exression which contributes to our individual creative

YES, THIS MIGHT PROVE A STRONGER DETERRENT

We are in receipt of an interesting post card from one William R. Sullivan, 720 West Tenth Place, Los Angeles 15, California.

"Fines have not solved our moving traffic vi-olations . . . . Better results might be obtained by impounding the car for a few days instead. This might prove to be a deterrent big enough to stop some of our careless driving."

The thought expressed is obviously n The thought expressed is obviously not without merit since not many becopie would be willing to risk impounding of their car for the sake of indulging in driving which violates the rules of the road and (or) creates a hazard. A fine, especially one which may be paid out of court and requires no personal accountone escapes with a fine and costs. Cash with which

relivably prove a greater deterrent to those prone to "take a chance" than a fine.

It is apparent to the most casual observer of highway traffic trends and related law enforcement that laxness, excused and downright indifference re-our mounting traffic casualty toll must be brought up would be prepared to pay . . . . Personal sacrifice of something other than dollars and cents might just be the answer, even for minor offenses which, if not

At an engineering display in London, Eug., Russians have exhibited this model of their atom-powered ier-breaker which they are building for service in the Arctic. The ship is being designed for travelling indefinitely without refuelling.

### Editorial

ASIATIC FLU

Man has always been threatened by something. In the beginning he had to nip out of the way of dinosuurs and other menacing creatures and then, as time
spased, his enemies became smaller but more institue.
Instead of mammotha he is now trying to dodge
viruses of one kind or another, the latest of which is
the skatte flu bug about which we have been hearing
man by fluirs.

the Asiatic flu bug about which we have ones necessaries to much of late.

In the case of this latest virus (or combination of circuss), we fee! The Press of the nation has a grave responsibility in its handling of the news relating to the continuous of the continuous contin

sible handling of the Asiatic flu news (we don't mean overing up facts or burying our heads in the sand), is required if needless concern is to be spared people who are prone to worry unduly about such things.

A. U. S. doctor—Peter J. Steincrohn, M.D., P.A.C.P., makes the following observation on the disease which may prove helpfully informative to our readers:

"Here are some facts I have been reading about Asiatic flu in M.D., a medical news ungastine although the common of the stein of the

they can deal with it.

"The first cubreak of the disease was reported in China lass January. It spread to Hong Kong in April. Then It hopped for Formose, Philippines, Malaya, Indonesis, Japan, India and Pakistan. Although millions of people were attacked the estimated death total was about 1.500—which indicates the mildness of the disease. In June about 100 casses developed abourd two American ships that reached California from the East

East.

"The disease is produced by a virus or combina-tion of viruses. The three main types of virus are A, B, and C. We are on the trail of a possible D type. Each type has many strains; at least three have been isolat-ed from Type A in the Asiatic Influenza.

"The usual symptoms are excessive thirst, followed by fever and sore throat. Headache develops later associated with diffuse body aches. Cough is often a

prominent symptom.

"Trestment consists of strict bed rest for 2-3 days
plenty of fluids, bland diet, isolation and taking sali-

plenty of fluids, bland diels, isolation and taking sail-cytales (Aspiris, etc.) If pseumonia is a complication it usually responds well to antibiotics.

"How about prevention? We can thank, among others, the Walter Reed Army Institute of Research for starting the ball rolling." They first heard of the Asian influence on April 18. Within 48 hours they seen an epidemiologist to investigate. The virus was iso-

lated by May 10.

"Right now a half-dozen of the finest drug manufacturers in the United States are working hard to produce a racchie that will "light" for you. The armed forces will get the first dozen. As production increases, the vaccine will be available for those civilians who want protection.

As is now generally known Canadian drug hous are making an effort to cope with anticipated vaccine
